

The Left Believes that “Reproductive Freedom”

=

Transitions for Minors

Many people in Missouri are already aware of the petition being circulated to amend our Missouri Constitution in a way that would allow abortion of any type (3), up until the moment of birth (4), without any regulation of the government regarding medical or hygienic standards (3), and without parental consent for minors (2,3). This proposed amendment would also prevent any woman who has been injured or sterilized by an abortion to sue the abortion provider (5). Additionally, it is very likely that Pregnancy Help Centers may be required to refer clients to abortion providers (3,5).

This is pure evil!

As if all that is not bad enough, however, this proposed constitutional amendment has “trojan horse” embedded in it! **The open secret on the left is that the term “reproductive rights” is not JUST about abortion, but includes gender transitions.** Here are some links to some prominent names in the trans movement openly acknowledging this on their website.

<https://www.childrenshospital.org/programs/transgender-reproductive-health-service>

<https://nwlc.org/resource/reproductive-rights-include-bodily-autonomy-for-trans-and-intersex-youth/>

<https://www.uchicagomedicine.org/conditions-services/transgender-care-services/trans-care>

You will see in the actual wording of the proposed amendment (on the reverse side) that the terms “reproductive freedom” and “reproductive health care” would be inserted into our state constitution! They have used the terms “reproductive health” and “reproductive freedom” many times with no legal definition of that term. A court will be forced later to determine what this language means. Do we really believe that a court in the future will define these terms as narrowly referring to abortion when the left is already using this language to speak about gender transitions? I think not!

We NEED your help! To this point everyone has thought of this as a fight over abortion. **IT IS SO MUCH MORE!** Help spread the word that this language would allow ANY healthcare worker to transition minors without parental consent and with immunity from medical malpractice suits. Little 7 year old Billy would be able to go to the school nurse and say that he thinks he might be a girl. The nurse would tell Billy that next week the Planned Parenthood mobile unit will be around to the school and he can pick up his gender transition drugs from them and not tell Billy’s parents.
